

REDHORSE CRM V6.6 RELEASE NOTES 11/4/2014

- 6.6.4647 NEW RedHorse Mobile
- 6.6.4647 NEW Require strong password for mobile users
- 6.6.4647 NEW Send email directly from Workflow instead of sending to Outbox
- 6.6.4647 NEW New color schemes available and updates to the current and default color schemes
- 6.6.4647 NEW Support for new Google v3 Calendar API
- 6.6.4647 NEW Modify recids systemwide to replace characters invalid in html to allow use of RedHorse Mobile
- 6.6.4647 NEW Modify stored procedures systemwide to replace @@ character on parameters with @
After running setup.exe, also be sure to update Constant Contact Sync Engine, Workflow Engine and Gmail Sync Engine, if you are using them.
All workstations set up with Outlook sync should uninstall any old version of the link and install the new version for v6.6.
Any customizations using stored procedures or hard coded recids should be investigated to determine if they need modification to work with v6.6.

Structure Changes

- Favorites New Table
- Users Add Column USERS7
- Users Alter Column USERS4
